Word Processor (Exams) Policy

***"I can do all things through Christ who strengthens me."* – Philippians 4:13**

Introduction

This policy is reviewed and updated annually on the publication of updated JCQ regulations and guidance on access arrangements and instructions for conducting exams.

References in this policy to AA and ICE relate to/are directly taken from the Access Arrangements and Reasonable Adjustments 2025-2026 and Instructions for conducting examinations 2025-2026 publications.

Purpose of the policy

This policy details how the centre manages and administers the use of word processors (including laptops and tablets) in examinations and assessments.

Principles for using a word processor

Bishop Douglass School complies with AA chapter 4 (Managing the needs of candidates and principles for centres), section 5.8 (Word processor) and ICE (sections 14.20-25) when awarding and allocating a candidate the use of word processor in examinations.

(AA 4.2.1)

- Candidates with access to word processors are allowed to do so in order to remove barriers for disabled candidates which prevent them from being placed at a substantial disadvantage as a consequence of persistent and significant difficulties
- The use of word processors is only permitted whilst ensuring that the integrity of the assessment is maintained, at the same time as providing access to assessments for a disabled candidate
- The Additional Learning Support lead/SENCo must ensure that the proposed access arrangement does not disadvantage or advantage a candidate.

(AA 4.2.2)

- The use of a word processor is not granted where it will compromise the assessment objectives of the specification in question

(AA 4.2.3)

- Candidates may not require the use of a word processor in each specification. As subjects and their methods of assessments may vary, leading to different demands of our candidates, the need for the use of a word processor is considered on a subject-by-subject basis

(AA 4.2.4)

- The use of a word processor is considered and agreed where appropriate at the start of the course. Candidates are subsequently aware that they will have the use of a word processor for examinations and controlled assessments/coursework
- Candidates are made aware that they will have the use of a word processor for examinations and non-examination assessments (including controlled assessments/coursework)

(AA 4.2.5)

- The use of a word processor for candidates is only granted if it reflects the support given to the candidate as their 'normal way of working', which is defined as support:
  - in the classroom; or
  - working in small groups for reading and/or writing; or
  - literacy support lessons; or
  - literacy intervention strategies; and/or
  - in internal school tests and mock examinations

  The only exception to this is where an arrangement may need to be put in place as a consequence of a temporary injury or impairment at the time of an exam or assessment.

The use of a word processor

The centre will

- allocate the use of a word processor to a candidate with the spelling and grammar check/predictive text disabled (switched off) where it is their normal way of working within the centre (AA 5.8.1)
- award the use of a word processor to a candidate where appropriate to their needs. For example, a candidate with:
  - a learning difficulty which has a substantial and long term adverse effect on their ability to write legibly
  - a medical condition
  - a physical disability
  - a sensory impairment
  - planning and organisational problems when writing by hand
  - poor handwriting (AA 5.8.4)
- only permit the use of a word processor where the integrity of the assessment can be maintained (AA 4.2.1)
- not grant the use of a word processor where it will compromise the assessment objectives of the specification in question (AA 4.2.2)
- consider on a subject-by-subject basis if the candidate will need to use a word processor in each specification (AA 4.2.3)
- process access arrangements/reasonable adjustment at the start of the course, or as soon as practicable having firmly established a picture of need and normal way of working, ensuring arrangements are always approved before an examination or assessment (AA 4.2.4)
- provide the use of word processors to candidates in non-examination assessment components as standard practice unless prohibited by the specification (AA 5.8.2)

The centre will not

- simply grant the use of a word processor to a candidate because they prefer to type rather than write in exams or can work faster on a keyboard, or because they use a laptop at home (AA 5.8.4)

Exceptions

The only exceptions to the above where the use of a word processor would be considered for a candidate would be

- in the event of a temporary injury or impairment, or a diagnosis of a disability or manifestation of an impairment relating to an existing disability arising after the start of the course (AA 4.2.4)
- where the curriculum is delivered electronically and the centre provides word processors to all candidates (AA 5.8.4)

Centre Specific Processes

- Bishop Douglass School allows the use of Word Processors when a candidate has illegible handwriting.

Word processors and their programmes

Bishop Douglass School complies with ICE 8.8 *Word processors* instructions by ensuring:

- word processors are used as a type-writer, not as a database, although standard formatting software is acceptable
- word processors have been cleared of any previously stored data, as must any portable storage medium used
- an unauthorised memory stick is not permitted for use by a candidate
- where required, candidates are provided with a memory stick, which has been cleared of any previously stored data, by a nominated member of centre staff
- word processors are in good working order at the time of the examination
- word processors are accommodated in such a way that other candidates are not disturbed and cannot read the screen
- where a candidate using a word processor is accommodated separately, a separate invigilator is used
- word processors are either connected to a printer so that a script can be printed off, or have the facility to print from a portable storage medium
- documents are printed after the examination is over
- candidates are present to verify that the work printed is their own
- word processed scripts are inserted in any answer booklet which contains some of the answers
- word processors are used to produce scripts under secure conditions, and if they are not then the centre is aware that they may be refused by the awarding body
- word processors are not used to perform skills which are being assessed
- word processors are not connected to an intranet or any other means of communication.
- candidates are not given access to other applications such as a calculator (where prohibited in the examination), spreadsheets etc when using a word processor
- graphic packages or computer aided design software is not included on a word processor unless permission has been given to use these
- predictive text software or an automatic spelling and grammar check is disabled unless the candidate has been permitted a scribe or is using voice recognition technology (the script must have a completed scribe cover sheet included), or the awarding body's specification permits the use of automatic spell checking
- voice recognition technology is not included on word processors unless the candidate has permission to use a scribe or relevant software
- word processors are not used on the candidate's behalf by a third party unless the candidate has permission to use a scribe

Laptops and tablets

Bishop Douglass School further complies with ICE 8.8 instructions by ensuring:

- tablets used during examinations/assessments are designed to run for a long period of time once fully charged and are 'free-standing'
- the battery capacity of all laptops and/or tablets is checked before the candidate's examination(s) with the battery sufficiently charged for the entire duration of the examination
- candidates with fully charged laptops or tablets are given the opportunity to be seated within the main examination hall without the need for separate invigilation and power points
- candidates are reminded that their centre number, candidate number and the unit/component code must appear on each page as a header or footer
- candidates using Notepad or Wordpad software (which do not allow for the insertion of a header or footer) are instructed to handwrite their details as a header or footer once they have finished the examination and printed off their typed script; candidates are also supervised to ensure that they are solely performing this task and not re-reading their answers or amending their work in any way
- candidates are instructed to appropriately number each page
- candidates are instructed to use a minimum 12pt font and double spacing
- invigilators remind candidates to save their work at regular intervals
- where it is possible 'autosave' is set up on each laptop/tablet
- candidates are present at the end of the examination when their script is printed off so they can verify that the work printed is their own

Accommodating word processors in examinations

Candidates using word processors (including laptops or tablets) are internally accommodated in the following manner:

- Exam Hall or classrooms if this is where the main exam is taking place.

Invigilation arrangements relating to the use of word processors include the following:

- The desk is clearly labelled to identify that the candidate is entitled to use a word processor
- At the end of the exam the work is transferred onto a USB memory stick, an invigilator escort the candidate to the exams office where the work is printed and the forms are signed to verify that all the pages are their own work and complete.
